Principales missions

- **Renforcer et développer les plateformes technologiques + investissements**
- Elaborer et **mettre en œuvre une politique scientifique**
- **Faciliter les échanges** et les collaborations scientifiques sur le site
- Contribuer à **l'animation scientifique**
- Favoriser et accompagner **l'intégration de nouveaux chercheurs / nouvelles équipes**
- **Soutenir le transfert industriel**
- Promouvoir les **interactions entre recherche préclinique et clinique**

SFR Interactions Cellulaires et Applications Thérapeutiques 2

- SFR 4208

La SFR Interactions Cellulaires et Applications Thérapeutiques est essentielle au site de recherche en biologie angevin. Elle permet d'asseoir le développement de la recherche en biologie sur le site angevin, tout en favorisant la représentation angevine avec les partenaires régionaux ou nationaux.

Ses missions sont avant tout d'assurer une mutualisation des plateformes du site, de favoriser les échanges entre les laboratoires et de servir de lien entre les partenaires institutionnels (Université d'Angers, Inserm, CNRS, InVS, Région) et les laboratoires de recherche.
